🎀Welcome to My World!🎀

About Mel

Hellowz, I'm Melati Dwina Firdaus a backend-web developer
and aspiring IT consultant with a passion for building structured, functional, and scalable digital systems.
Currently studying Software Development (PPLG), I focus on backend technologies like
PHP/Laravel, Java, C#, and MySQL. I'm confident in designing APIs, handling data logic, and debugging complex systems.

I also actively explore writing, design, and education technology, combining creativity with technical precision. With experience in school-based projects, organizational roles, and national competitions, I aim to keep growing through real challenges and meaningful collaborations.

Project

Kalkulator Deret Aritmatika

Masukkan suku pertama (a):

232

Masukkan beda persekutuan (d):

32

Masukkan jumlah suku (n):

12

Hitung

> **Suku ke-12 (Un): 584**
> **Jumlah 12 suku pertama (Sn): 4896**

Formula Deret Aritmatika

A pixel-themed interactive website built with HTML, CSS, and JavaScript to help users understand mathematical concepts in a more visual and engaging way.
